PORTFOLIO

Interactive Calendar | [Figma](#), [Lucid.app](#), [Adobe Creative Suite](#), [Webflow](#)

[Map](#) | [Prototype](#)

A modern and highly interactive calendar that is currently being used as a service (SaaS)

- Oversaw the entire **UX/UI Design Process** from **Ideation** to **Delivery**.
- Collaborated closely with the client's team and the development team.
- Utilized **Industry Standard Design Practices** to create a **Responsive** website with functionality across all platforms and screen sizes that runs on and syncs with Google Calendar.

Modern | [MongoDB](#), [Express](#), [React](#), [Node](#) - **MERN Stack**

[Live](#) | [GitHub](#)

A Full Stack clone of Medium

- Incorporated the **Cloudinary API** for storage and retrieval of images.
- Implemented user authentication using the **JSON WebToken** library, **Axios**, and **JWT-Decode**.
- Utilized **Mongoose ORM** to map the results of database queries onto JavaScript objects which can be manipulated and returned to the frontend, separating concerns and following MVC best practices.

Picturesque | [Rails](#), [PostgreSQL](#), [React](#), [Redux](#), [AWS](#)

[Live](#) | [GitHub](#)

A Full Stack clone of Instagram

- Utilized **React** and **Redux** to create a single-page application with a global source of truth.
- Improved **User Experience** and **Authentication Flow** by designing custom, responsive React components.
- Utilized a **FileReader** object using **AJAX** to asynchronously read and upload the file contents to the server.
